WORK EXPERIENCE

Front End Web Developer

Codematics

📅 October 2019 - current

📍 Abbottabad, Pakistan

- Developed a full fledged admin panel for Transporter (international client) and Kardaam (company's product).
- Responsible for building the front-end for HireWire (international client) and BidNow (company's product).
- Modified existing code written in programming languages such as Vue.js and JavaScript.
- Ran debugging tools such as Firebug and Chrome Inspector to eliminate flaws and glitches prior to publishing.
- Collaborated with the graphic design team to integrate images as basic site components.
- Conducted testing and review of website design for responsiveness, clarity and effectiveness.
- Planned website development, converting mockups into usable web presence with HTML, JavaScript, AJAX and JSON coding.

IT Analyst (Internship)

OMERS

📅 May 2018 - August 2018

📍 Toronto, Canada

- Updated 2 10-year-old knowledge base documents (installation guides) on SharePoint by modifying the steps to be up to date and match the latest software standard which decreased the time it took to solve repetitive issues by 80%.
- Created a new equipment inventory in Excel by conducting a physical inventory of over 900 items (500 monitors, 300 laptops, 150 cell phones). Maintained and constantly updated the inventory until the end of internship with a 99.5% accuracy rate.
- Automated the process of finding AD group membership for employees by writing a PowerShell script. In 5 minutes, the script found group memberships of 250 employees and recorded the results in a CSV file.

IT Desktop Support (Internship)

CaseWare International

📅 January, 2017 - August, 2017

📍 Toronto, Canada

- Configured and launched office Floor Plan Mapper system which decreased our helpdesk's response times by ~50% for in-person support calls.
- Successfully migrated 1500+ IT knowledge base documents from an old Plone-based system to a cloud-based platform, AODocs.
- Reformatted over 700 documents that didn't retain their formatting during migration, corrected broken/outdated links, styled headings and sub-headings and added bullet points where needed.
- Saved CaseWare \$7277 CAD by organizing all existing equipment inventory, allowing IT staff to better locate items to make use of them. This cut down on cases where unnecessary purchases were being made due to being unable to locate existing inventory.
